

DETAILED ACTION

In view of applicant's remarks, it was decided that a restriction requirement between the Groups set forth below is proper at this time. The examiner regrets any inconvenience this may cause applicant.

Election/Restrictions

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 2-9,11,14,15,18,19, drawn to a roll assembly including a laser optical continuous monitoring means.

Group II, claim(s) 20-32, drawn to a roll assembly with a heat treating means.

The inventions listed as Groups I and II do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: the special technical feature of Group I is the roll assembly along with the laser optical monitoring means. The special technical feature of Group II is a roll assembly with heat treating means.

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement may be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To preserve a right to petition, the election must be made with traverse. If the reply does

not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.
